Information Document for the post of Assistant Scientist (Farming for Water EIP) Local Authority Waters Programme

INTRODUCTION

The EU Water Framework Directive [WFD] 2000 seeks to protect and improve our natural waters, including rivers, lakes, groundwaters, coastal waters, and transitional waters. The Water Framework Directive environmental objectives are outlined in the National River Basin Management Plan [RBMP] and measures to achieve them in our Programmes of Measures [POMs].

In July 2014, the Department of Environment, Community & Local Government issued the European Union [Water Policy] Regulations 2014, which gave effect to a new, three tier, governance framework and placed new obligations on local authorities to co-ordinate the catchment management and public participation elements of the Water Framework Directive.

To enable local authorities to meet their objectives, they have established the Local Authority Waters Programme [LAWPRO] to facilitate a coordinated regional approach through a WFD Team. Kilkenny County Council and Tipperary County Council, acting jointly, have been appointed as lead local authorities to act on behalf of all local authorities [shared service] in managing this Programme.

CONTEXT

LAWPRO is leading a 'new approach' to water management in Ireland that involves coordination and close cooperation between local authorities, WFD implementing bodies and stakeholders for the development and implementation of a national River Basin Management Plan. The overall aim of this approach is to protect and restore good water quality in Ireland's rivers, lakes, estuaries, groundwaters, and coastal waters through integrated catchment management. Achieving that aim will require active involvement of local authorities and other public bodies, water users and local communities.

Implementation of the River Basin Management Plan is co-ordinated on a regional basis by the five WFD regional water and environment management committees, comprising of representatives of each local authority in the region and the EPA. This structure drives collaboration and integration, both within local authorities, between local authorities and externally with other public agencies. This shared services approach to delivery includes all stakeholders through a multi-disciplinary, multi-agency structure.

LAWPRO ensures that the resources are utilised locally to implement the Water Action Plan 2024.

The strategic role of the Programme is:

- To promote knowledge sharing and coordination in implementing the Water Action Plan 2024 and Programme of Measures (POMs) by local authorities, other public authorities, sectoral interests, and community groups.
- To co-ordinate/undertake statutorily required public consultation in the development of the National River Basin Management Plan (Water Action Plan 2024) and Programmes of Measures and a public awareness campaign in water resources management.
- To deliver on the actions assigned in the Water Action Plan 2024.
- To seek consistency of Water Action Plan implementation across agencies through the operation of the WFD Regional Committees.
- To assist the Minister and the EPA and work collaboratively with local authorities in the development of the RBMP and POMs.
- To mobilise and support engagement of voluntary and community groups in protecting our natural waters.
- To foster linkages with industry and agricultural sectors.
- To develop linkages with local sectoral representative organisations, such as Catchment Partnerships, Rural Development Companies, Rivers Trusts, Tidy Towns Groups, business and industry sectors including Chambers of Commerce, farming organisations, sports clubs and volunteering sectors, angling and outdoor recreational user groups, etc.

In July 2023, LAWPRO and its partners were successful in their bid to deliver a new Farming for Water European Innovative Partnership (FFWEIP) Project. The Farming for Water EIP is a national pilot specifically focusing on reducing losses of phosphorus, nitrogen, sediment and, where relevant, pesticides to water from agricultural lands by promoting the adoption of innovative best practice in nutrient management, the application of nature-based Natural Water Retention Measures (NWRM) and other suitable measures at the farm level following the principals of Integrated Catchment Management (ICM) and science.

The €60 million [Farming for Water EIP project](#) aims to improve water quality while supporting climate change mitigation and biodiversity protection. Successful candidates will gain hands-on experience, work alongside experienced agricultural advisors and scientists and contribute to a high-impact, exciting initiative.

This recruitment process is for additional staff for the Farming for Water EIP and is being managed by Tipperary County Council on behalf of LAWPRO.

the appropriate level of resources required to deliver the Water Action Plan up to end of 2027, and beyond to the 4th Cycle of the Water Framework Directive. Further opportunities may arise in LAWPRO resulting from this review. Public Consultation on the timetable and work programme for Ireland's fourth-cycle Water Action Plan 2028 – 2033 has commenced.
